Dear Laura,

Thank you for your message. I also received your voicemail message Friday and apologize that I wasn't able to call you back then. By the time I was back at my desk and heard your message, it was well after 6pm EST so I thought I would wait until today.

Anyway, if you can respond to this message and provide me with your mailing address, I can send you some information regarding perchlorate occurrence in Los Angeles County per your request below.

Please let me know if you have any questions. My direct number is 415-744-2182.

Thank you,
Catherine McCracken

Subject: perchlorate information

Dear Ms. McCracken,

I recently spoke to California DHS regarding the perchlorate information they had posted on their website, and they suggested contacting EPA Region 9 for more information. I am interested in any maps or data you may have on the following topics:

1. Known sources of perchlorate contamination in Los Angeles County
2. Places where perchlorate has been detected in the groundwater in Los Angeles County. (DHS has information on perchlorate in drinking water, but does not give the location of the wells).

Please let me know if any of this information is available to the public. I appreciate your help.

Sincerely,

Laura Chap
